Related Experience

Software Engineer I *UKG*

June 2023 - April 2026

- Supported UKG Ready's global payroll capabilities through full-stack development
- Coded and maintained ownership of a library of REST API endpoints in Java
- Automated test cases using Selenium and Bozr and performed thorough quality assurance for all changes
- Enhanced frontend user experience of Ready's onboarding pages using Typescript and React
- Developed AI agents and tools to reduce customer TTL and create simplified, user-friendly onboarding experience
- Monitored logs across Datadog and Kibana to find and resolve relevant, customer-facing bugs
- Aggregated relational databases into customizable XML reports using SQL queries, stored procedures, and views
- Collaborated across disciplines with Product, UI, and Support teams to implement best design practices

Gameplay Programmer & Producer *Massachusetts Digital Games Institute*

May 2022 - August 2022

- Published Cafe Cat, 2D time-management game with 10k downloads, to iOS and Google Play stores using Unity
- Produced team of developers and artists with daily stand-ups and Kanban to maintain scope and workflow
- Maintained organized code and project documentation through Plastic SCM version control
- Programmed C# scripts for state machines, pathfinding, interaction systems, user interface, and polish elements
- Built and deployed latest version of game weekly for internal testing and player feedback

Web Developer *Coverys: Medical Liability Insurance & Solutions*

July 2021 - December 2021

- Improved client experience of Med-IQ website which offers courses to medical professionals to mitigate malpractice
- Performed full-stack web development to ensure users could access correct courses and certificates
- Implemented OOD practices and MVC patterns to maintain and debug Med-IQ website using C# and ASP.NET
- Collaborated with QA, development, and business teams in daily stand ups using Agile/SCRUM methodologies

Projects

Covey.Town Collaborative Whiteboard

February - April 2023

- Implemented whiteboard feature to existing remote collaboration tool codebase using Typescript, React, and NodeJS
- Created user stories and conditions of satisfaction to guide Agile development process
- Conducted code reviews, stand-ups, and sprint retrospectives to keep team organized and improve production

Education

Northeastern University, Boston, MA

May 2023

Khoury College of Computer Sciences

Bachelor of Science in Computer Science and Game Development

GPA: 3.88/4.00 Dean's List
